# Paper Bunting

1. Choose the size of triangles for your bunting.
Draw your triangle on a piece of card to create a template.

2. Take some colourful paper or card and fold it over.
Place the template on the paper with the folded edge
at the top of the bunting. Draw round the template.

3. Cut round the sides of the triangle,
being careful not to cut the folded edge.

4. Repeat steps 2 and 3 until you have enough folded diamonds for your chosen length of bunting.

5. Take your chosen length of string and place the paper bunting with the fold over the
string. Glue the two sides of the paper together so that the paper is held in place
over the string.

6. Repeat step 5 and add more triangles along the string, spacing them evenly.

7. You can add extra decoration to your bunting by decorating the triangles with
patterns or pictures.
